

# Fallopian Ring Applicator

Extended Tip

Extended Tip  
with (1) Silastic Ring

Extended Tip  
with (2) Silastic Rings

- Silastic Ring Applicator is a clinically well-established procedure as a contraceptive method based on decades of experience.
- The Silastic Ring Applicators are made for single or dual ring applicator with one single insertion.
- The instruments are available in three different lengths for use through the operating scope (single puncture approach) or through trocar sleeve in conjunction with a laparoscope (multi-puncture approach).
